- Kitchen: Condiments, spices other than those provided: BBQ sauces, etc.
- Paper products: Napkins, etc.
- Lake safety: water shoes, lifejackets, water toys, etc.

TIPS AND TRICKS

- **Please do not use the Oven Self Cleaning option. It is malfunctioning and will cause the oven to lock up, requiring a \$250 repair.**
- There are two vacuum cleaners, one newer and one older. The older vacuum cleaner is old but it works fine. The on/off switch is taped in the on position because the switch doesn't work. Just use the plug to turn it on or off. If these are not working well please clean out the filter on the old one, and replace the filter on the new one.
- The two single beds in the bedroom adjoining the master bedroom are junior beds intended for children or small adults.
- When lighting the gas stove the clicking sound indicates the lightening positioning of the knob. After the burner is lit, move the knob past this position such that the clicking sound stops.
- The fireplaces are operated by thermostats on the wall, near the main furnace thermostats. It will be the simpler of the two. Just move it until the fire comes on. Note that in the heat of the summer the pilot lights may be turned off to reduce heat and gas. Please do not use the fireplaces if they won't come on.
- The big fan in the breakfast nook is operated both by a right switch on the far breakfast nook wall, and a remote control, usually left near the stereo.
- Do not use bubble bath in the whirlpools. They foam up too easy and usually spill out of the tub.
